Where to Travel for Winter Sun in 2023

BY HAYLEY MAITLAND

January 5, 2023

We're officially past the solstice—meaning some winter sun is most definitely in order. Here, find nine hotels the *Vogue* team is hoping to check into for a much-needed hit of vitamin D in the coming months.

Mexico

There's a host of design-focused stays launching in the Yucatán in 2023, but Casa Chablé, which opens its doors this January, may well be the most impressive. To begin with, it's set in the UNESCO-protected Sian Ka'an reserve south of Tulum, whose cenotes, reefs, and jungles are home to everything from ocelots to manatees. Powered by renewable energy, each of its 10 rooms is comprised from sustainable, local materials such as Zapote wood and Galarza stone—meaning the exteriors blend seamlessly into the landscape—while interior designer Paulina Moran has filled each room with natural textures. The majority of guests arrive by boat—it's a 30-minute trip through the mangroves surrounding the resort to get to its private dock—but the islet on which the hotel's 10 rooms stand can be reached via car or helicopter, too. There's lots to do here, from star gazing to spear-fishing—but when the beach is this paradisiacal, why do anything else but laze?

Casa Chablé sits within the UNESCO-protected Sian Ka'an reserve.
